Connect to the Internet

Get online using your phone's data connection or Wi-Fi.

Using a data connection

It's simple. When you turn your phone on for the first time (with the SIM card inserted), it should connect automatically to your mobile operator's data service. If presented with a list of mobile operators to choose from, make sure that you select the correct one for your SIM card, if you're not sure, contact your service provider.

Using Wi-Fi

1. From the Home screen, press MENU.
2. Tap **Settings > Wireless & networks**.
3. Select the Wi-Fi check box to turn Wi-Fi on.
4. Tap **Wi-Fi settings**, and then choose a Wi-Fi network to connect to.

Fast browsing

Enjoy fast web browsing on your phone. With the powerful processor, you can be sure that viewing web pages will be smooth. Also, with Adobe® Flash® support, no websites are out-of-bounds.

Record in HD

Capture those priceless moments in HD and share them on YouTube.

1. From the Home screen, tap > **Camcorder**.
2. Press MENU, tap **Video quality**, and then select **Online (HD, 10 minutes)**.
This makes sure that the video you're capturing can be uploaded to YouTube.
3. Tap to start recording; tap again to stop recording.

4. On the review screen, tap > **YouTube**.
5. Enter a title, add details about the video if you want, and then tap **Upload**.

Catch up with friends

Friend Stream connects you to your social networks. Share and get updates from friends in popular networks like Facebook and Twitter in a single feed. With Friend Stream, you can easily track your friends' status messages, photo uploads, notifications, and more — or comment and post your own.

Locations

Locations is your perfect travel companion, whether you're at home or in a different country. Easily browse maps, search for nearby places of interest, and get directions to places you want to go to.

Maps for free

Your phone already comes with a map installed. What map you'll have depends on the country where you bought your phone.

Before you travel to other countries, you can download more country maps to your phone for free. Then, you won't need to use your data connection when browsing maps and searching places, freeing you from costly data roaming fees.

Upgrading services

If you need turn-by-turn GPS navigation and safety camera information, you can purchase them as add-on services.

1. From the Home screen, tap > **Locations**.
2. Press MENU, and then tap **Get more**.
3. Slide to the tab of the service, and then tap what you want to purchase.
4. Tap **Purchase**.

To find out more about how to use Locations, see the complete user guide.

Get HTC Sync

You can use the HTC Sync software to sync contacts, calendar, and other information between your computer and your phone. Download the HTC Sync software for your device from our support website (www.htc.com/support) and install it on your computer.

Visit our support website (www.htc.com/support) from time to time to check for the most recent HTC Sync upgrade so you can download and install it.

Battery saving tips

Here are some things you can do to get the most out of a single charge.

Turning off automatic updates

For some apps such as Weather, turn off automatic update. In the Weather app, press MENU, tap **Settings**, and then clear the **Update automatically** check box.

Using the Power Dashboard widget

Quickly adjust and turn on or off settings that affect battery power.

1. On the Home screen, press and hold an empty area.
2. Tap **Widget > Settings > Power Dashboard > Select**.

Tap the icons on the widget to adjust or turn on/off the setting.

Turning on power saver

Set your phone to automatically switch to power saver mode when the battery level reaches a certain level.

1. From the Home screen, press MENU, and then tap **Settings**.
2. Tap **Power**, and then select the **Enable power saver** check box.
3. Tap **Turn power saver on at** and **Power saver settings** to set and select power saver options.

For the complete user guide and other helpful resources, go to www.htc.com/support. Please also read the Safety and regulatory guide that's included in the box.

Before you do anything else, please read this

Charge the battery

The battery in your phone hasn't been charged yet. While your phone is charging, it's important that you do not remove the battery pack. Doing so can damage your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

Choose a rate plan wisely

Depending on how you use your phone, it can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you talk to your mobile operator about data rates.

Using data services while roaming will be costly. Check with your mobile operator for data roaming rates before you use data roaming.

Know about privacy laws

Some countries have strict laws about how and when you can record phone conversations. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

And finally, a few important words from our legal team (LIMITATION OF DAMAGES)

To the maximum extent permitted by applicable law, in no event shall HTC or its affiliates be liable to you, any user, or third party for any indirect, special, consequential, incidental or punitive damages of any kind, arising in contract, tort, or otherwise, including, but not limited to, injury, loss of revenue, loss of goodwill, loss of business opportunity, loss of data, and/or loss of profits, regardless of the foreseeability thereof or whether HTC or its affiliates have been advised of the possibility of such damages. And in no event shall the total liability of HTC or its affiliates exceed the amount received from you, regardless of the legal theory under which the cause of action is brought. The foregoing does not affect any statutory rights which may not be disclaimed.

Get to know your phone

Before you turn on your phone

Make sure you prepare your phone correctly before you press the POWER button.

Removing the thin film from the battery

1. With the phone switched off, hold your phone securely with the front facing down.
2. With your finger, lift up the back cover from the small opening at the back of the phone to remove it.
3. With your thumb or finger, lift the battery off from the opening on the left side of your phone, and remove the thin film that's wrapped around the battery.

Where's the microSD card?

The microSD card is already inserted into your phone. If you need to remove the microSD card, push it in to eject it. To reinsert, push it in until it clicks into place.

Inserting your SIM card

With the SIM card's gold contacts facing down and its cut-off corner facing out, push the SIM card all the way into the SIM card slot.

After inserting the SIM card, reinsert the battery into the battery compartment.

Replacing the back cover

1. Secure the top part of the back cover first by aligning into the two openings located at the back of the phone (right below the camera lens).
2. Press the sides and bottom part of the back cover towards the phone. You'll hear a click when the back cover is locked in place.

Charging the battery

Use the supplied power adapter and USB cable to charge your phone.

Set up your phone

The first time you turn on your phone, you'll be guided to transfer contacts to your new HTC phone using Bluetooth, set up your email and social network accounts, and more. Be sure to sign in to your Google™ Account so you can use Google apps such as Android Market™ on your phone.

Your Home screen

Personalize your phone just the way you want it. There's up to seven Home screen panels you can customize with widgets that show live updates of weather forecasts, social network feeds, and more. You can also keep things organized on your Home screen by grouping apps or shortcuts into separate folders.

Organizing your Home screen with folders

1. Press and hold on an empty space on the Home screen and then tap **Folder > New Folder**.
2. Tap In the apps list, press and hold an app and then drag it to your folder.

If you have shortcuts created on your Home screen, you can also drag a shortcut to your folder.

3. Tap your folder to access the apps or shortcuts inside it.

And here's another tip. When your folder is open, press and hold its title bar to change the folder name.

Keep your life organized

Keep your life in order by keeping track of your schedules, contacts, and email messages.

Keeping track of your events in Calendar

If you're signed in to your Google Account, Facebook, and Exchange ActiveSync accounts, you can use the Calendar app (or the Calendar widget) to view your events from those accounts.

You can also easily add a new event to any of your calendars.

1. From the Home screen, tap > **Calendar**.
2. Press MENU and tap **New event**.
3. Choose a calendar to which you want to add the event.
4. Fill in the details of the event, and then tap **Save**.

Adding all your contacts in People

In the People app, you'll see your contacts from your Google Account, Facebook®, and even your Exchange ActiveSync® account if you're signed in to these accounts on your phone. Aside from their contact details, you'll also see their status updates and birthday reminders if they're your Facebook or Twitter™ friends.

If you have more contacts in your SIM card, you can import them all to your phone in one go:

1. From the Home screen, tap > **People**.
2. On the **All** tab, press MENU. Then tap **Import/Export > Import from SIM card**.

If you have a Google and/or Exchange ActiveSync account on your phone, choose the account where to put your contacts.

3. Press MENU, and then tap **Select all > Save**.

You can also add new contacts:

1. From the Home screen, tap > **People**.
2. Tap **Add contact**. Then enter the contact information in the relevant fields.
3. Tap **Save**.

Managing all your email accounts

If you signed into your Google Account when you first set up your phone, you'll be able to send and receive Gmail messages. From the Home screen, just tap > **Gmail**.

Use the Mail app to set up and manage your other email accounts such as webmail, POP3, IMAP, or Exchange ActiveSync accounts.

1. From the Home screen, tap > **Mail**.
2. On the **Choose a mail provider** screen, choose the type of email account to set up.

If you don't see this screen, press MENU, tap **New account**, and then choose the type of email account.

3. Enter the **Email address** and **Password** for your email account.
4. Follow the onscreen instructions to finish setting up your email account.

In the Mail app, you can check your email messages just in one place without having to switch to different accounts. Just choose the **All accounts** inbox. Email messages are color coded so you can easily distinguish which email accounts they belong to.
